

GRIVEANCE CELL AWARNESS PROGRAMME 2022-2023:

On Jan 12, 2023, an orientation program was conducted for students to acquaint them with the grievance resolution system. This session provided a borough overview of various grievance categories, such as academic concerns, non-academic issues, instances of discrimination, and harassment. These categories were explained in great detail.

Moreover, students were equipped with essential information about how to initiate the grievance submission process. This guidance included instructions on drafting grievances, the locations where complaints could be submitted, and the expected timeframe for resolving grievances. Additionally, the orientation introduced students to the members of the grievance cell and informed them about the availability of personal guidance and counselling sessions, along with the appropriate communication channels to access these support services.
